

SIMM Services and Safety Audits for Tronox Group of Mines, South Africa

Project Overview:

SIMM Services and Safety Audits for Tronox Group of Mines, South Africa

Client:

Tronox Group

Location:

Namakwa Sands Smelter (Saldanha), Mineral Separation Plant (Koekenaap), Namakwa Sands (Brand se Baai)

Completion Date:

Ongoing since 2012

Scope:

ET-Global has been a steadfast partner in ensuring the structural integrity and safety of the Tronox Group's mining operations across multiple sites. Our dedicated services focus on comprehensive Structural Inspection & Maintenance Management (SIMM) and meticulous safety audits.

Key Contributions:

- Conducted thorough structural inspections and provided maintenance management for critical infrastructures across three key sites: the smelter in Saldanha, the mineral separation plant in Koekenaap, and the mining operations in Brand se Baai.
- Implemented rigorous safety audits to identify and mitigate potential hazards, ensuring compliance with the highest safety standards.
- Offered expert recommendations for maintenance, repairs, and enhancements, contributing to the operational longevity and safety of the facilities.
- Built a long-term relationship with the Tronox Group, underlining our commitment to excellence in safety and structural integrity in the mining sector.
